Smart Library Request Workflow in ServiceNow

TEAM MEMBERS: M. MEGAVALLI

S. JEGADEESWARI

A. AADHIL KHAN

A. ALLWIN MOSES

1. Introduction

- A role-based Library Management System developed using ServiceNow platform.
- Automates book borrowing, approval, and tracking process.
- Improves efficiency and transparency in academic libraries.

2. Problem Statement

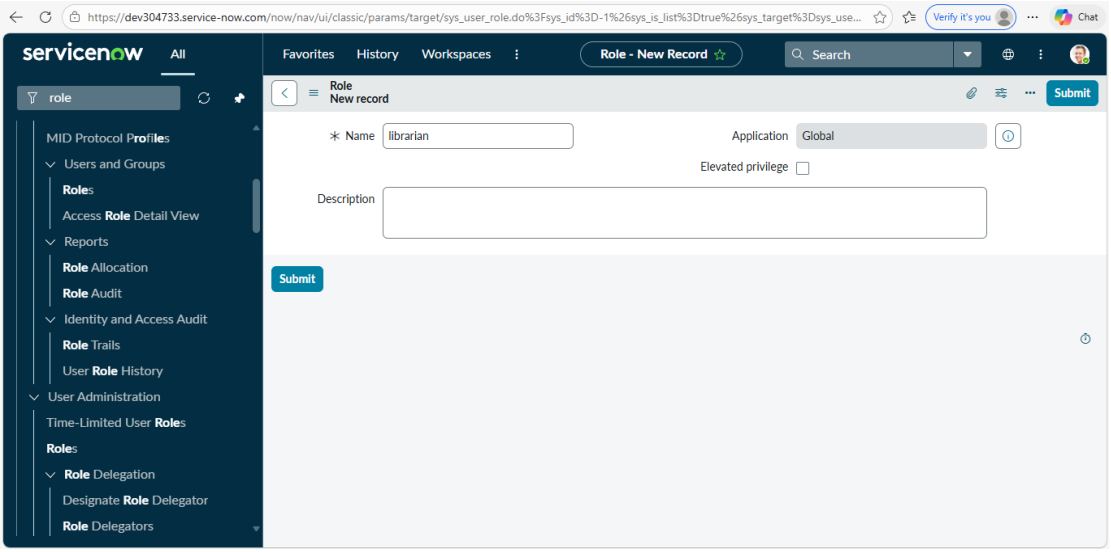
- Manual tracking of books causes delays and errors.
- No real-time visibility of book availability.
- Difficult approval and reporting process.

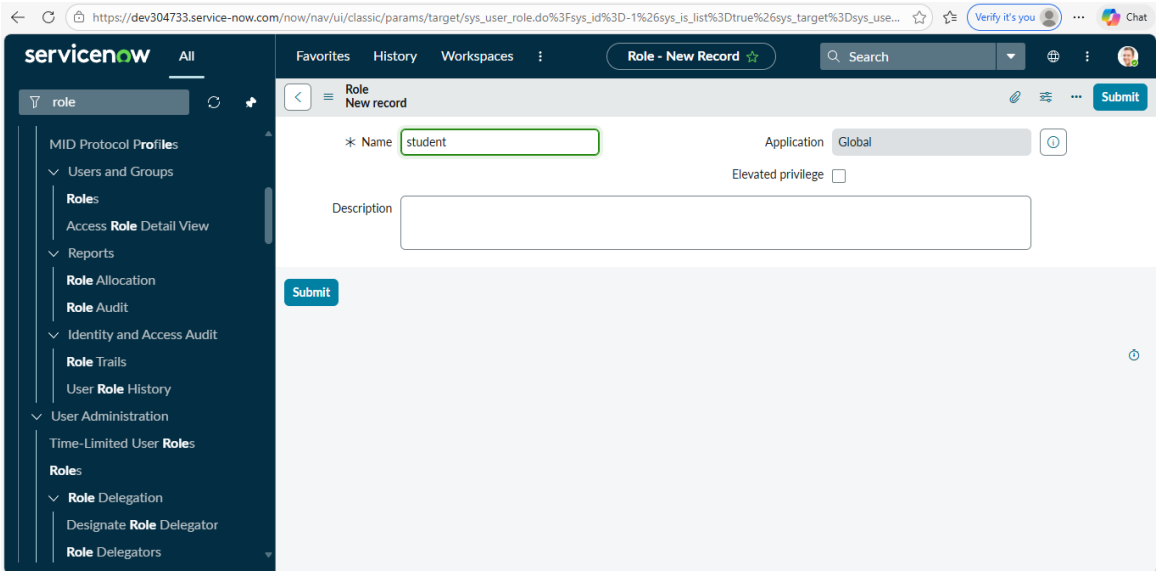
3. Objectives

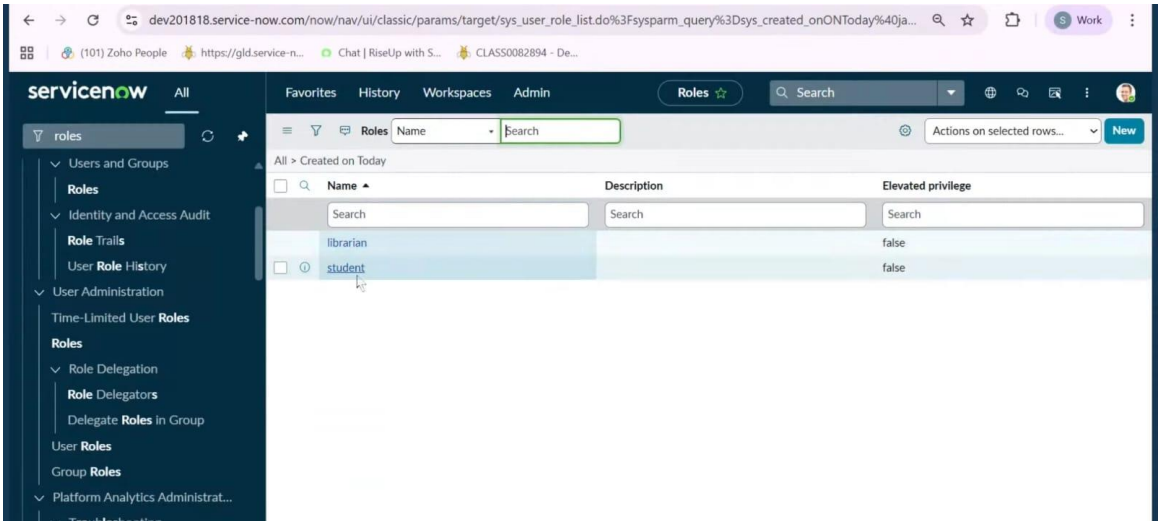
- Automate borrow request lifecycle.
- Implement role-based access (Student & Librarian).
- Enable real-time book status updates.
- Generate analytical reports for management.

4. Roles and Responsibilities

- Student: Create and track borrow requests.
- Librarian: Manage catalog and approve/reject requests.
- Admin: Configure system and maintain secu



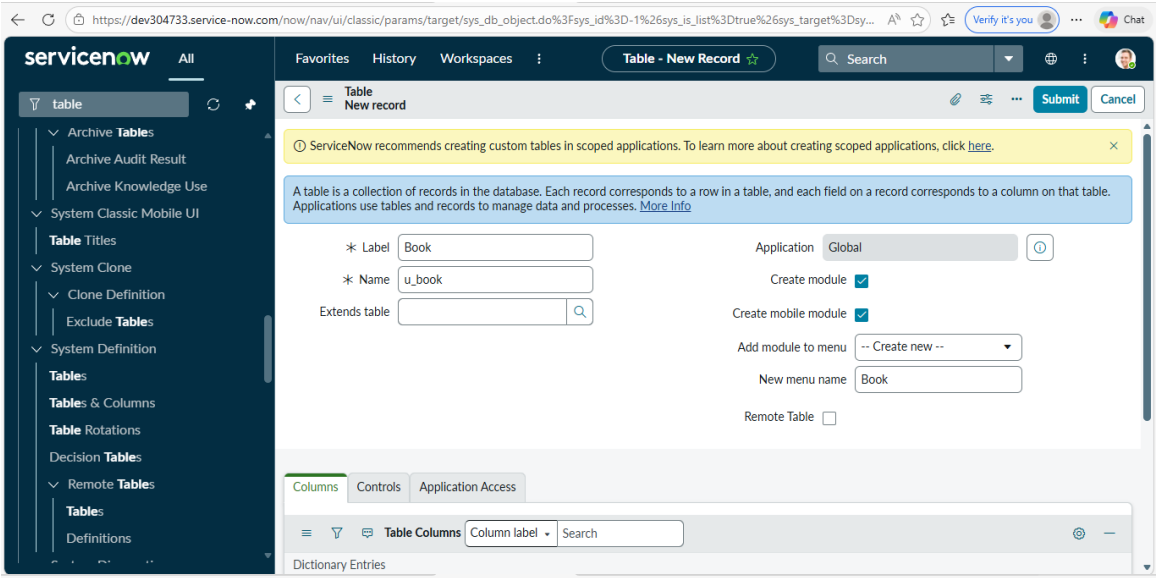


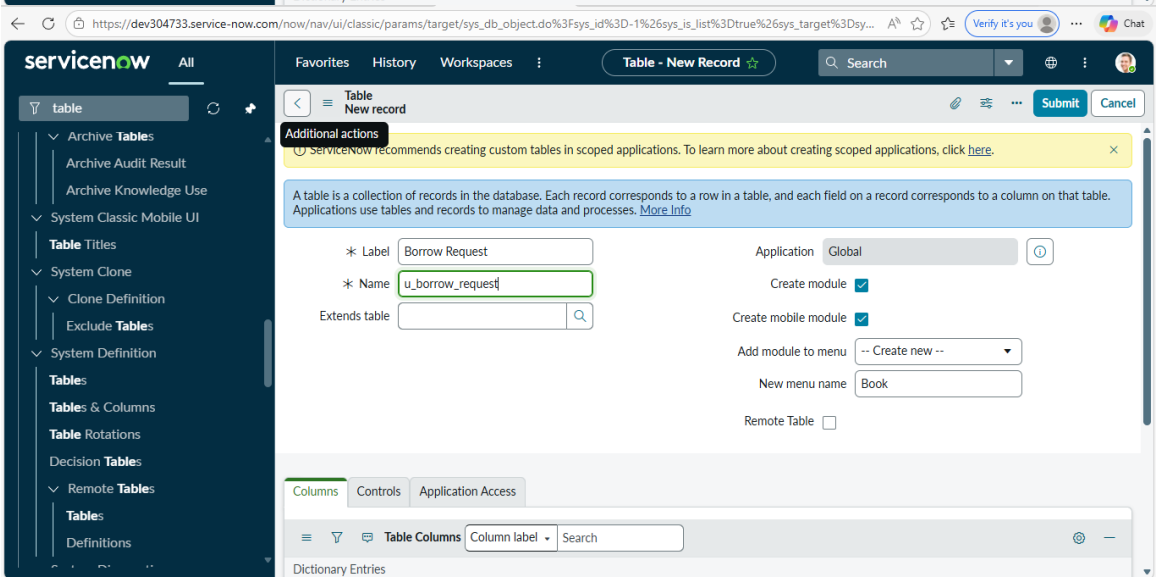


5. Tables Created

- Book Table (u_book): Title, Author, ISBN, Status.

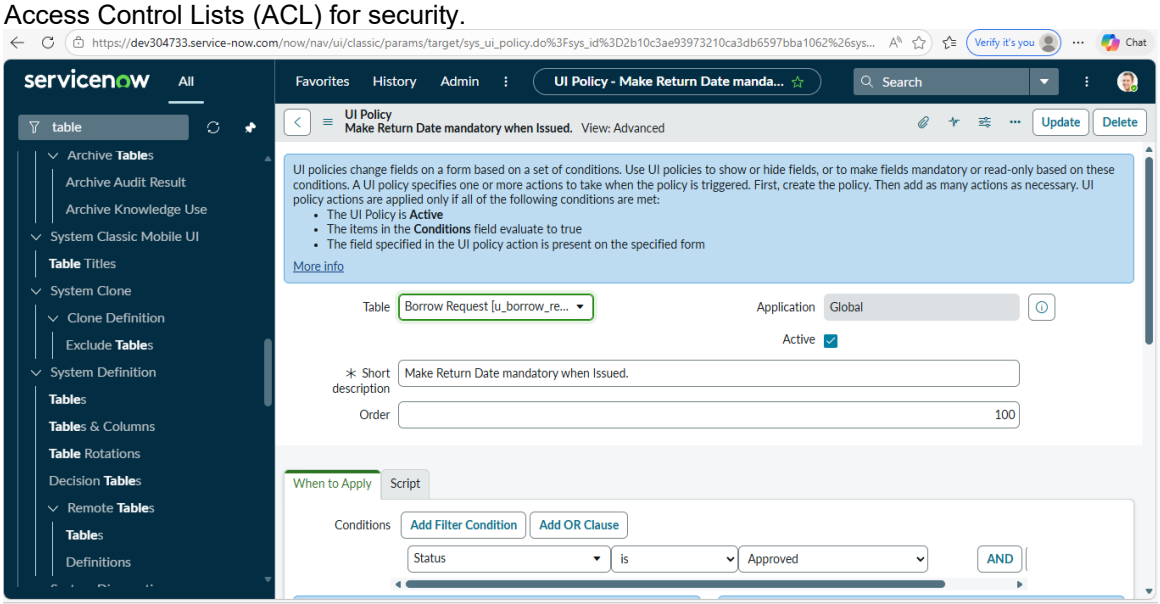
- Borrow Request Table (u_borrow_request): Requested By, Book, Date, Status.

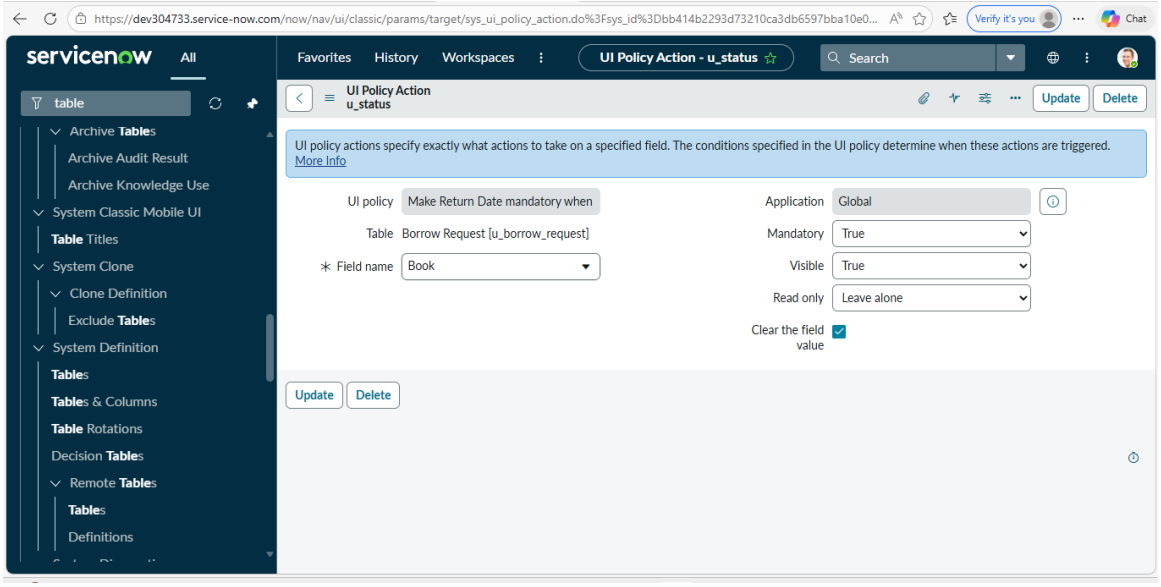


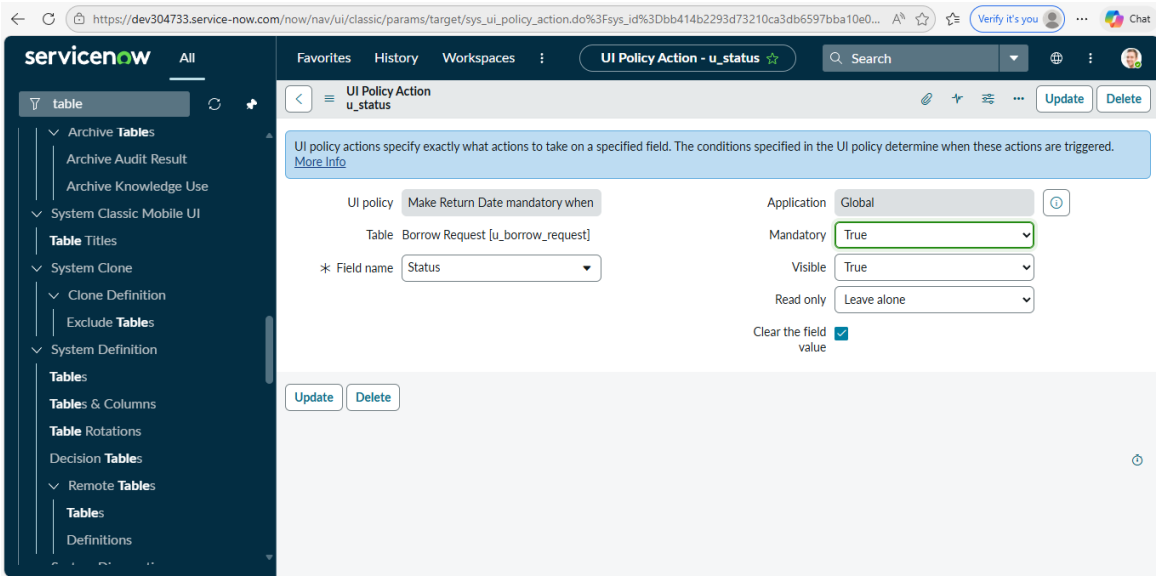


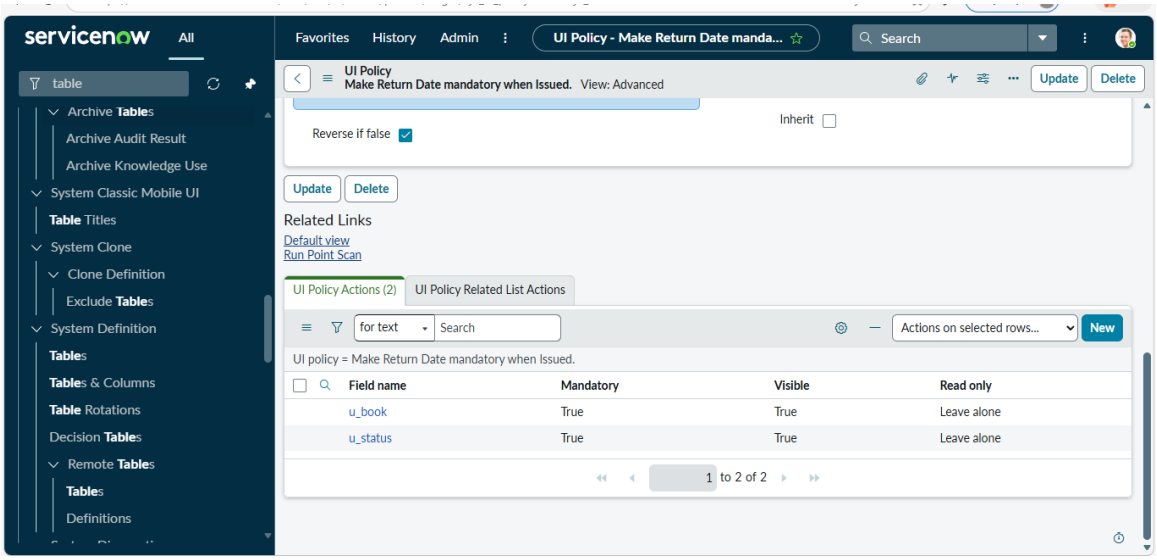
6. Key Features

- Reference Qualifier to show only available books.
- Flow Designer automation for approval and issuance.
- UI Policy for dynamic field control.
- Access Control Lists (ACL) for security.









7. Workflow Process

- Student submits request.
- Librarian receives approval notification.
- On approval, Book status changes to Issued.
- Email notification sent to student.
- Book returned and status updated.

8. Reporting

- Most Borrowed Books report.
- Grouped by Book and counted by Approved status.
- Helps management decision-making.

9. Innovation

- End-to-end automation.
- Role-based security implementation.
- User-friendly dynamic forms.
- Scalable architecture.

10. Future Enhancements

- Overdue reminders via Email/SMS.
- Advanced dashboards and analytics.
- Integration with digital library

11.Conclusion

- The project successfully digitalizes and automates library operations.
- Improves efficiency, accuracy, and user experience.
- Provides a scalable solution for academic institutions.
